Innegra™ Technologies to Exhibit at JEC World Composite Show

Join us in Paris, France in Hall 6 - Booth E6 March 8th-10th

Greenville, SC | February 1, 2016 – The Innegra Technologies team will exhibit at JEC World Composite Show and Conference March 8-10 at Paris Nord Villepinte in Paris, France. We welcome you to stop by our booth to see the latest products reinforced with Innegra fiber and discuss how Innegra materials can benefit your product.

Innegra, the lightest fiber commercially available, has proven to add benefits to reinforcements by adding toughness, impact resistance, vibration damping, and damage tolerance. Today a multitude of applications reap the benefits of Innegra including: automotive, industrial, SUP boards, kayaks, paddles, bicycles, hockey sticks, tennis rackets, helmets, rope, and more. Innegra Technologies plans to expand its reach into all composite applications providing a benefit of more durability and lighter weight.

This year, several products will be featured in hall 6 at booth E6 and the JEC World Innovation Planets. The Innegra booth will feature Innegra S fiber and JEC Award winning, Innegra H fibers. In addition, many brand products will be on display all reinforced with Innegra. The products include a bicycle frame built by Berk Composites, a WIME snowboard, custom designed skis by Jared French, North American Rescue Pegasus Rope, a Bauer Hockey goalie mask and Bauer Hockey stick. Innegra will also be featured in the JEC World showcase in the “Sports Planet” and the “Auto Planet”. On display in the “Sports Planet” will be a Bauer goalie mask, BIC Sport stand up paddle board, WIME snowboard, Adventure Technology paddle blade, and HEAD tennis racquet. While “Auto Planet” will showcase an automotive quarter panel reinforced with Innegra.

Innegra Technologies is committed to customers and their application development. Contact us today to schedule your appointment to speak with our sales team.

About Innegra Technologies

Innegra Technologies, headquartered in Greenville, South Carolina, is an advanced materials company that delivers innovative high performance fibers which improve the performance of composite and textile applications. Innegra S has an extensive patent portfolio in the U.S.A and international. Worldwide, Innegra is distributed and used in a wide range of reinforcement products. About JEC

The JEC Company was created in December 1996 as a subsidiary of CPC, The Center for Promotion of Composites, a non-profit association. At the head of JEC since its creation, Mrs. Frederique Mutel fully committed to the expansion of composites, was instrumental in the establishment of JEC as provider of high value knowledge and networking services, at the same time, conducting a strong international development. In addition to its headquarters in Europe (Paris, France), JEC opened offices in America and Asia.
