

INNEGRA TECHNOLOGIES ADDS COMPOSITE EXPERTISE
High performance fiber manufacturer adds Composite Engineer to R&D team.

August 1, 2014 - Greenville, SC - Innegra Technologies is pleased to announce the expansion of its research and development team.

Russ Emanis joins Innegra Technologies LLC as Chief Composites Engineer. Russ is responsible for knowing how Innegra works in a variety of processes and how to best use Innegra fibers and fabrics to optimize performance in composite parts. He has over 30 years of composites and processing experience. Russ began his work with Innegra fiber and fabrics as North American Sales Manager of Materials and Composites at JB Martin Ltee. He also has extensive experience in the aerospace industry having spent several years managing a composite production group for aerospace parts at Lockheed Martin. This addition to the Innegra Team will allow the company to better support its end use customers in their design and processing of Innegra fibers and fabrics in composite applications.

Innegra Technologies LLC is a high performance yarn manufacturer headquartered in Greenville, SC. The company sales focus is on advanced composites and textile applications for sporting goods, marine, container and automotive industries as well as applications in the rope and netting markets. Please join us in welcoming Russ Emanis to the Innegra Technologies Team. Russ can be reached at remanis@innegratech.com.
